AREAS

IN A NUTSHELL

Fixed and mobile digital hubs can support digital engagement and innovation. Digital hubs exist across a range of settings (i.e. as coworking or networking spaces; as innovation spaces in specific economic development contexts; as spaces for emergent technology demonstration; or as public access points to broadband), and depending on your local digital ambitions, you may choose to build one. This e-learning module follows on from the 'Digital Hubs: Understanding the concept' module.
